

# DECORATIVE GRAVELS

**Snow White - 20mm**

Snow White provides an economical alternative to other white pebbles. A crushed limestone aggregate that provides a crisp touch to any garden area. The soft white colouring is a contemporary contrast to charcoal or beige pavers and accent foliage. Also available in 10mm.

**Cowra White - 20mm**

Cowra White is a rounded pebble which is light in colour with flecks of grey and gold throughout. The popular decorative is currently available in a 20mm size and is useful as an easy to lay alternative to pavers.

**Deco Granite**

Deco granite is available in soft tan/mid brown colour. It is suitable for driveway, courtyard and pathway designs. It is able to be compacted to provide a hard, long lasting and presentable alternative to pavers and concrete. For extra durability it can be mixed with cement before application.

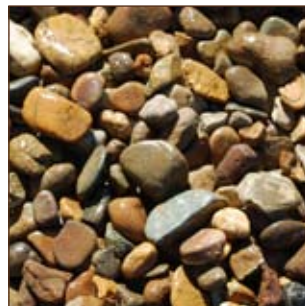

**Cowra Gold - 20mm**

Cowra gold is a brilliantly coloured golden pebble that provides a formal touch to any garden or pathway. This decorative brings in warmth - a harmonious complement to sandstone look walls and soft green foliage.

**Brown River Pebble - 20mm**

A popular round river pebble used for a harmonious finish. Suitable for native gardens the different sizes can be blended to create layering in dry-creek bed designs. BRP 20mm is an ideal size to use as a permanent stone covering in garden areas. 10mm also available.

**Brown River Pebble - 40mm**

A popular round river pebble used for a harmonious finish. BRP 40mm is a larger size that can be used as a feature in garden areas and rockeries. Particularly effective, when used with complementary products, such as sandstone boulders or lucky stones.

**Terracotta Fines**

Attractive soft red recycled tile - at an economical price. Terracotta Fines have a smaller particle size making the product suitable for use on pathways and driveways. Stabilise with off white cement for added strength.

**Terracotta Mix - 20mm**

Attractive soft red recycled tile. Terracotta mix is a popular 20mm aggregate suitable to provide a warm and vibrant garden finish, or an economical covering for low use areas such as side passages between house and fence.

# DECORATIVE GRAVELS

## Lucky Stones 100 - 300mm

Larger rounded stones in creamy browns and greys. Random sizes up to 200mm. Use as feature stones to that compliment River Pebbles. Group stones, and plant in crevices, for natural looking rockeries. Or border in gentle curves on beds planted with natives to create the feel of the bush.

## Sandstone - minus 20mm

Ideal for a wide range of landscape designs where a natural finish is required. Sandstone pebbles come in a variety of sizes and have a neutral colouring well suited to match contemporary structures. Commercial quantities only with samples and prices available on request.

## Sandstone Boulders

Sandstone boulders provide an easy to lay natural border with the yellow tones providing texture to the garden. Placed strategically they can also provide a focal point to plantings. Sandstone boulders are available in random sizes from fist size to 2 man lift. Boulders can be graded by request.

## Bluestone

Bluestone is an angular rock traditionally used for retaining walls and erosion control. The flat surfaces can provide a panoramic feature that draws the eye across the garden. Brown and green grey tones soften the charcoal colouring, giving each rock an individual appeal. Sizes do vary, but the average is around 500mm.

## Imported Pebbles - white

Imported bagged pebble available in soft pure white. Ideal for use as a feature in structural designs and pots. 20kg bags - 20 - 30mm and 50 - 80mm. Other sizes and colours by request.

## Imported Pebbles - black

Imported bagged pebble available as a tumbled, polished black. Ideal for use as a feature in structural designs and pots. 20kg bags - 20 - 30mm and 50 - 80mm. Other sizes and colours by request.

Berry Reserve - Timber edging divides blue metal aggregate 40-70mm and sandstone 20mm minus to give a low maintenance finish highlighted with lomandras. Sandstone boulders segment areas and provide depth.
