

DECORATIVE MULCH

Superior Pine Chip

Superior Pine Chip is completely natural, with no additives. It is free of the pathogens and weed seeds often found in leaf mulch. It consists of pine chip and pine bark with some finer particles and larger sizes. It is coloured from golden brown, to rust and will slowly darken and turn grey over time.

Hardwood Chip

Hardwood Chip is similar in consistency to superior pine chip, however, has the added advantage of taking longer to breakdown. It is a mid brown and will darken over time. Hardwood chip is not recommended near concrete or paved areas as water run off will stain.

Coloured Pine Chip

A medium grade, 10mm to 25mm, colour enhanced wood chip. This product is a recycled by-product from plantation timber wood and waste. It is coloured using environmentally safe dyes and can be purchased in an earthy red which provides a warm contrast to foliage.

Eco Soft - Playground Mulch

A hammer milled softwood pine product that has several uses. Similar in size to Eucie mulch with the added benefit of being certified for use as playground mulch, it is light and absorbing which help minimize injuries in these areas.

Eucie Mulch

Eucie mulch is a most attractive, mid brown hardwood mulch that is uniform in colour and texture. Being a finer grade, Eucie mulch is particularly good in windy areas and sloped sites due to binding properties that hold the product together. It is one of our most popular mulch products.

Cypress Mulch

This attractive, tan coloured mulch is available as a fine textured mulch. It combines the attractive finish and ease of application of Eucie mulch with an important added benefit: it is resistant to white ants. This completely natural organic mulch is ideal for garden beds adjacent to houses or timber fences

Pine Bark 15mm (Micro-Nuggets)

Pine bark is a recycled by product of the plantation pine timber industry. Pine Bark micro nuggets are smaller square chunks that break down slowly for a durable and long lasting finish in formal gardens.

Pine Bark 30mm (Mini-Nuggets)

Pine bark 30mm is the most popular size available. This material provides a most attractive, red to dark brown, chunky mulch, which lasts well. It is the mulch of choice for many government and schools projects due to its attractiveness and durability.
