

PRODUCT TECHNICAL SHEET

Soil Mixes

product name	GO Mix n Feed
description	A rich, nutrient balanced blend of composts and manures, screened to 50mm for a medium texture. This blend is a proven performer in the Illawarra-Shoalhaven region. It is an outstanding soil conditioner, which breathes life back into run down, clayey or sandy soils. Being a blend, there is a reduced risk of "burning" plants with over rich materials, as can happen, for example, with straight poultry manure, and this same characteristic means it is not subject to quality variations such as occurs with straight mushroom compost.
source	:: GO Compost manufactured from recycled organics and certified to AS 4454 - Soil Conditioners. :: Turkey and cow manure sourced from local farms before being composted and blended.
benefits	:: Friable blend with excellent moisture infiltration and drainage. :: Organic matter in compost and manure provides slow releasing organic nutrients & water holding capacity. Also provides humus which improves soil structure.. :: Manures provide vegetables with essential nutrients, particularly nitrogen, phosphorus & potassium.
application	As a soil additive before planting - Apply a layer 50mm thick over existing garden bed. Dig in, mixing well with soil - and then water. As a topdressing - This is best done in spring or the active growing season. Apply approximately 50mm of Mix n Feed around established plants, keeping well away from trunks or stems. Water well to start the movement of nutrients into the soil.
uses	Here are some of the plants which will thrive with the application of GO Mix n Feed: :: Flowering plants - Roses, Chrysanthemums and other exotic flowering shrubs. :: Vegetables - All vegetables but particularly brassicas, tomatoes, capsicums and eggplants. :: Fruit Trees - Although suitable for most fruit trees, gross feeders such as citrus and bananas will love GO Mix n Feed. Also strawberries.
warning	<i>Due to the high nutrient content, we do not recommend planting directly into GO Mix n Feed. See the Soil Mixes fact sheet or visit the Soilco website to see the product best suited to your garden needs.</i>
