

SOIL MIXES

GOLD BLEND

Gold Blend is a friable organic soil blend certified to Australian Standard AS4419 (Soils for Landscaping and Garden Use). Premium ingredients are designed to ensure early results and long-term performance. Gold Blend is highly recommended for all garden uses and features a high organic content. It has excellent infiltration and drainage characteristics providing superior results.

LANDSCAPE (NATIVE) MIX

Landscape Mix is a certified sandy soil blend designed to suit Australian Native plant species. The acceptable pH and phosphorous levels making it Soilco's recommended native garden mix. The mix is also a good multipurpose blend that can be used as a turf underlay for kikuyu or couch lawns.

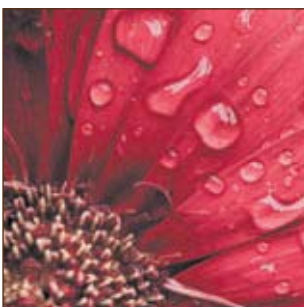

TURF SPECIAL

A special blend of river sand, loam and GO Compost that is designed to meet recommendations for buffalo, couch & fescue lawns. It resists compaction & provides excellent water penetration and drainage. The compost aids in water holding capacity which is essential in times of low water availability and nutrient retention. Turf Special is suitable as a turf underlay or topdressing material.

ORGANIC TOP DRESSING

A lightly textured GO Compost plus river sand and soil blend. Finely screened, it provides easy spreadability and outstanding water infiltration and absorption characteristics. Topdressing Mix, contains quick acting NPK fertiliser as well as the slow release characteristics of its organic composts. This assists lawns to retain long-term growth and colour through seasonal stresses.

GO COMPOST™

GO Compost™ is a certified composted blend of garden organics. It can be used in as a mulch or soil improver in a variety of different situations. Benefits of adding compost include:

- Increased water holding
- Improve Structure
- Provide organic nutrients
- Provide soil micro-organisms beneficial to plant growth and soil health
- Retain fertiliser in the soil
- Reduce watering requirements.

GO MIX N FEED

A rich, nutrient balanced blend of composts and manures, screened to 50mm for a medium texture. This blend is a proven performer, and an outstanding soil conditioner, which breathes life back into run down, clayey or sandy soils. It can also be used as a short-term soil booster, especially for vegetables and annuals. Mix it in and watch the results.

SOIL MIXES

Soil Mixes

Soilco manufactures a range of general purpose and specific soil mixes. Customers inquiring about a mix are advised to consider key information which will assist with ordering what best suits their needs.

- :: Usage of area - Is it for Garden beds, turf, native regeneration?
- :: Existing site soil - Will it be excavated, built up or improved?
- :: Types of plants - What will be the nutrition and water requirements?
- :: Drainage - Is drainage adequate or will it need to be improved?
- :: After planting maintenance - What steps can be taken to minimise maintenance?

Soilco has a range of different soil mixes for a variety of applications. Cross reference the table below to find the best product for your situation.
