

We've got you Covered

Spreading difficult products efficiently

Get the Complete Package

Soilco is now able to offer spreading services for large scale soil, mulch, manure and compost applications. Recent projects have illustrated cost efficient methods for applying these types of growing media to a variety of environmental, rural & urban projects.

The universal trailer spreader has tandem axles with wide tyres to limit compaction and ensure optimum handling in the most difficult of terrains. With an opening of 1.5m, products high in moisture and organics are easily spread a width of 5 to 10m. Application rates from 5m³ per hectare upwards can be achieved.

For more information, please contact the Spreader Manager Tony Emery.
